Pandemic Shop Bot

1. IBM Account and Watson Assistant service was already created during the training.
2. Chabot : Pandemic shop following things are implemented
 1. Intents: Enquiry, Order, Greetings
 2. Entities: Email, Enquiry, Greeting, items, order, payment and specials
3. NodeRed service was initially insatlled. But to get more acquiantance uninstalled it and implement the flow of chatbot by using the file provided by the mentor.
4. Downloaded the JSON files of Bot and uploaded it on Github repository.
5. Created the bot demonstration video and uploaded on the git hub repository.
